Projects

Mobile Android App | *Android Studio, Flutter, Dart, Rails 6.0 API, Puma Server, Devise, MySQL,* **January 2021**

- Developed an Android mobile app prototype which enabled users to order food online. The name of the app was Quik Quisine.
- Worked on back end, added features permitted users to input ingredients, and provided recipes based on those ingredients. Users were provided ways to purchase missing ingredients.

Corona Virus React Website | *React, Google Maps API, Node, JavaScript, HTML, CSS* **November 2020**

- Deployed a website named Buzzkill in which users were able to report on areas where people were not complying to the CDC's social distancing, and mask mandates. This app was based on applications where users were able to report local crimes.

Fitness Tracker | *JavaScript, HTML, CSS, Node* **October 2020**

- Web application that allowed users to track their workouts as well as the sets and reps of each workout on a daily basis.
